

## CLAIMS:

1. A device (100) for presenting to a user information about a selection of programs, the device comprising:
- a specification unit (106) for letting the user specify a preferred genre from a plurality of program genres by letting the user select a label (504) from a plurality of labels (502-510), each label corresponding to a respective one of the program genres;
  - a selection unit (112) for making the selection of programs from a plurality of programs on the basis of the preferred genre; and
  - a presentation unit (114) for presenting the information about the selection of programs;
- characterized in that the device further comprises a label assignment unit (116), which allows the user to assign a particular label (606) to a particular program genre (601), so as to make the particular label correspond to the particular program genre for the purpose of specifying the preferred genre.
2. A device (100) as claimed in Claim 1, wherein the label assignment unit (116) is arranged to let the user select the particular label from a group of labels.
3. A device (100) as claimed in Claim 2, comprising a storage unit (118) for storing the group of labels.
4. A device (100) as claimed in Claim 1, wherein the particular label (606) is a pictorial representation of the particular program genre (601).
5. A television receiver (200) comprising:
- a receiving unit (204) for receiving a video signal,
  - a device (100) for presenting information about a selection of programs as claimed in Claim 1, and
  - a display device (206) for displaying the video signal and the information.

6. A set-top box (300) comprising:  
- a receiving unit (304) for receiving a video signal, and  
- a device (100) for presenting information about a selection of programs as  
5 claimed in Claim 1.

7. A program storage apparatus (400) comprising a device (100) as claimed in  
Claim 1.

10 8. A method of presenting to a user information about a selection of programs,  
the method comprising:  
- letting the user specify a preferred genre from a plurality of program genres by  
letting the user select a label from a plurality of labels, each label  
corresponding to a respective one of the program genres;  
15 - making the selection of programs from a plurality of programs on the basis of  
the preferred genre; and  
- presenting the information about the selection of programs;  
characterized in that the method further comprises allowing the user to assign a particular  
label to a particular program genre, so as to make the particular label correspond to the  
20 particular program genre for the purpose of specifying the preferred genre.
